

ENTRAWOOD ENTRAKOR

OFFICE FURNITURE SOLUTIONS

ABOUT US

ENTRAWOOD and ENTRAKOR are proudly South African with over 30 years of experience in manufacturing office furniture.

HOW WE DESIGN MATTERS

We don't just design furniture we design a user experience. The aim of both our product and layout designs is to unlock potential. Our in-house design team attend world trade shows during the year to stay abreast with international design standards.

Based on your company culture, goals and employee needs we can help you create an office space as unique as your business.

HOW WE PLAN MATTERS

With state of the art manufacturing software we can design, optimise, components and calibrate machines from a central program.

Meticulous planning guarantees on-time deliveries, with a lead time of just 10 working days in Gauteng and 15 working days in all other areas.

HOW WE CREATE MATTERS

ENTRAWOOD and ENTRAKOR are proudly South African with over 30 years of experience in manufacturing office furniture. We promise high-quality products backed up by our 5-year manufacturing guarantee as well as a minimum of 90% local (SA) content on our main ranges.

HOW YOU WORK MATTERS

We believe that the world needs innovative entrepreneurs and successful small businesses; and that intentionally designed offices spaces and a vibrant office culture play a big role in their success.

By investing in the right office furniture and considered layout, leaders can take full advantage of their office space, effectively increasing productivity, lowering sick days and ultimately providing a return on investment that allows any business to prosper.

HOW YOU MEET MATTERS

The office can be strategically leveraged to encourage interaction and build synergy that will lead to behaviours that enhance innovation.

From formal presentations to informal brainstorming, from team meetings to client meetings, we can help you create an environment to facilitate and enhance the quality of these engagements.

HOW YOU FEEL MATTERS

Designing an environment, not just for visual impact, but also for health, comfort, flexibility and ease of use, ensures that you cultivate a happy, healthy and considerate company culture.

We offer complimentary space planning services to help you take full advantage of the structural and environmental elements to create a great employee experience.

ENTRAWOOD

SINCE 1989

WORLD CLASS MANUFACTURING PLANT

Entrawood, a purpose-built 11000 m² facility, is located half way between Johannesburg and Durban in Harrismith. Together with Entrakor, a steel component and upholstery business, we have the capacity to produce up to 5000 furniture components a day.

Entrawood has its own Melamine pressing plant which enables the company to operate independently, improve quality control, reduce stock holding and gives the company the freedom to choose its own melamine designs and adapt them according to changing trends.

We use computer aided manufacturing (CAM) and enterprise resource planning (ERP) software that was developed in house to manage everything from quotations and order taking to cutting lists and component specifications.

Our production line maximises the use of raw material, which reduces waste, cost and time.

MELAMINE FACED BOARD (MFB)

70-90 Gram of melamine-impregnated decor paper is pressed to both the boards surfaces at 200 degrees Celsius to create a durable, scratch resistant surface.

LAMINATE (HPL)

Our Evolution desking range can on request be quoted on and finished with a High-Pressure laminate that adds to the durability of the product.

EDGING

We use 1.6mm impact ABS & PVC edging with a High UV and scratch resistance. Matching colour or clear glue is used for an invisible bond-line. A fast setting PUR glue technology on edge banding with high initial strength, a good elasticity at low temperatures as well as a good solvent resistance.

BIRCH PLY

The Shell Range is a range of hand-finished high-quality birch ply office furniture. We combine the latest technology and machine precision with the care and patience of a true woodworker.

The 5-axis CNC working centre creates the chamfered edge which exposes the layers of birch ply and the quality of the products.

Finished with a High-Pressure laminate that adds to the durability and modern appearance

ENTRAKOR

SINCE 1985

COMBINED IN HOUSE OPTIMISATION

Entrakor opened in 1985, initially manufacturing steel tables and chairs for the household furniture market. Today Entrakor manufactures a variety of upholstered products as well as training and fold-up tables and components for Entrawood Desks.

The combined capability of Entrawood and Entrakor allows us to manufacture unique products, cost effectively. Entrakor is able to utilise off cuts from Entrawood, incorporating it into various products. This saves on material cost, while reducing waste which supports environmental sustainability.

UPHOLSTERY

Entrakor's upholstery department handles all Cocoon privacy booth products, screens, Salon sofa configurations or soft seating products as well as all stacking chairs.

Clients can either select fabrics from the standard ranges or choose fabric combinations of their choice (COM) to complement their office style and decor.
