

MOVE, SIT, STAND & WORK

"A 2012 study from the International Journal of Behavioral Nutrition and Physical Activity found that, on average, people spend 64 hours a week sitting. That's over nine hours of sitting a day.

Consider a standing desk because getting on your feet works the valves in your leg veins, sending blood up to your heart and more oxygen to your brain.

**As a rule of thumb, for every hour of sitting
try standing for 10-15 mins.**

ENTRAWOOD

We manufacture locally and can accommodate custom
designs and solutions.

MALUTI HEIGHT-ADJUSTABLE **DREAM DESK**

The Dream desk comes with a shaped birch ply top, finished with an X-treme Matt laminate (anti-fingerprint, anti-reflection, antibacterial). The Maluti single height-adjustable frame and has a programmable control. The user can set and store up to 4 preferred desktop positions.

Dual for 1500 x 750 tops

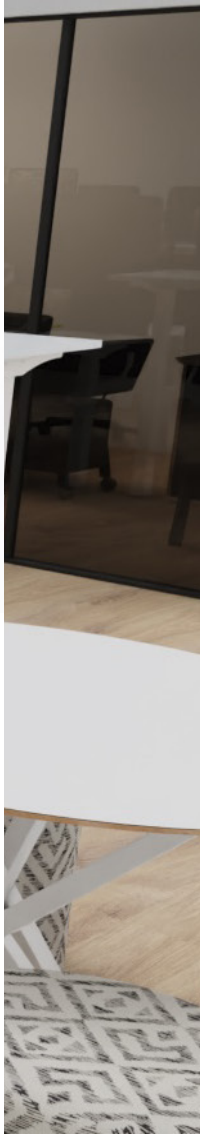

Dual for 1600 x 750 tops

Dual for 1800 x 750 tops

Dual for 2000 x 750 tops

Includes a standard up/down control

Screens are sold separately to accommodate custom colours and textures.

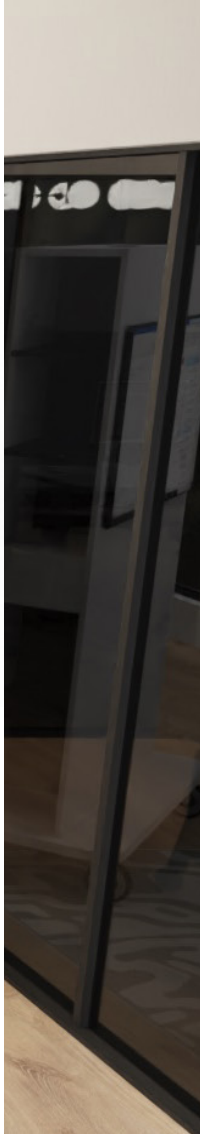

MALUTI HEIGHT-ADJUSTABLE **MEETING TABLE - PILL SHAPE**

The Maluti Height adjustable desks and tables have been designed and developed in South Africa for the African market. We use quality materials and electronic and drive components from Germany and Austria. Our European partners ensure that we stay up to date with international trends. The Maluti range brings state-of-the-art performance and flexibility to the modern workplace.

Desks are assembled in an assembly facility designed specifically for these products. Each leg undergoes friction testing, and is quality approved before being assembled. Final product is also checked & leveled before being packed. The desks have excellent stability and we have added a customizable pinch protection safety feature. The desks come with a 3-year warranty, and we stock all parts and electronics locally, in case something should go wrong.

ADD DESKTOP POWER & MONITOR ARM

The power set fits into the standard 80mm cable management port on the desk. Add more plugs under the desk in the cable tray to accommodate a second screen.

A monitor arm elevates your screen to optimal height to reduce the urge to slouch.

PROGRAMMABLE CONTROL

Replace the standard up/down controls with a programmable switch. The user can set and store up to 4 preferred desktop positions.

Hold the number of the preset position down. The desktop will stop moving once the preset position has been reached.

LOGICLINK CONTROL UNIT

You can upgrade to a LOGICLink control unit, which allows connection to a free Motion@Work app on your smartphone that can be used to control your desk movement within a Bluetooth range. The app can also alert you when it is time to stand again, helping you to optimise the use of the desk. Store your preferred height settings and review your desk usage on the app.
